

SEAN WANG

MOBILE GAME ART GENERALIST | UNITY | END-TO-END ART PRODUCTION

Xiamen, China | +86 176 0594 9491 | 1678145314@qq.com | Open to remote / overseas casual mobile game roles

PROFESSIONAL SUMMARY

3D Game Generalist with about 5 years of art experience, including 4+ years shipping and supporting overseas casual mobile games. Independently responsible for complete project-side art production across multiple commercial titles, from visual breakdown, 3D assets and UI to Unity implementation, visual QA, live-ops iteration and mobile optimization. Commercial experience includes My Tiny Tower with 10M+ Google Play downloads, multiple 1M+ titles, and long-running A/B-tested live games.

CORE CAPABILITIES

- End-to-End Game Art: visual reference breakdown, stylized environments/buildings/props, character-related assets, UVs, textures, materials, UI production and in-engine delivery.
- Unity Production: scene assembly, Prefab organization, material/UI setup, Animation / Animator integration, basic particle/trail/VFX adaptation and basic lighting adjustment.
- Visual QA & Iteration: project-level review of returned builds across UI, animation, scene presentation and implementation issues; coordinate fixes with programmers and recheck final results.
- Mobile Optimization: mesh reduction, material cleanup, texture/icon compression, asset-size and batch control; practical use of Frame Debugger, GPU Instancing and Dynamic Batching.
- Cross-Engine Delivery: lightweight art preparation from Unity to Cocos Creator for playable ads, typically supporting 2-5 MB art packages.

PROFESSIONAL EXPERIENCE

Xiamen Henwen Interactive Technology Co., Ltd. | 3D Game Artist / Project Art Owner

May 2022 - Present

Xiamen, China | Overseas Casual Mobile Games

- Own complete project-side art production from design briefs and style references to 3D assets, UI, Unity implementation, visual QA and live content updates.
- Create stylized environments, buildings, props, character-related assets, UVs, textures and materials; independently propose practical color/material/composition solutions within established style direction.
- Implement and organize art in Unity through scene assembly, Prefabs, material/UI configuration, object/UI Animation, Animator, basic VFX resources and character/animation integration.
- Conduct project-level visual QA on returned builds, identify visual, UI, animation and implementation issues, coordinate revision rounds with programmers, and verify final presentation.
- Optimize mobile art through mesh reduction, material cleanup, texture compression and batch control; use Frame Debugger plus GPU Instancing / Dynamic Batching where appropriate.
- Prepare lightweight Unity art assets for Cocos Creator playable-ad tests and create Google Play icons, store screenshots and other promotional visuals.
- Selected technical impact: reduced batches in a high-instance scene from about 300 to about 150; delivered art within low-end Android performance targets including stable 60 FPS on shipped projects.

Quanzhou Dasqi Digital Technology Co., Ltd. | 3D Designer

Aug 2021 - Apr 2022

Quanzhou, China | C4D / Redshift / Octane

- Created product and environment 3D assets and UVs in Cinema 4D.
- Built basic materials and lighting, rendered product/environment visuals with Redshift and Octane, and completed Photoshop post-production and simple showcase animation.

SELECTED COMMERCIAL PROJECTS

- My Tiny Tower | Project Art Owner**

10M+ downloads

 - Owned the project's primary art production and long-term visual updates across buildings, environments, props, character-related assets, UI, animation, basic VFX, Unity implementation, visual QA and art-performance control.
 - Results: ~4 years live operation / iteration | long-term A/B test D1 retention 32%-35% | initial CPI ~\$0.33 | Brazil D1 ROI reached 114%.
- Idle Oil Well | Project Art Owner**

1M+ downloads

 - Led full art production and Unity implementation for an industrial idle title, including environments/buildings, machinery and props, character/basic animation, UI, materials, scene assembly, VFX adaptation, QA, mobile optimization and live updates.
 - Results: initial CPI ~\$0.56 | initial D1 retention ~39% | D1 session length ~30 min | long-term D1 ~35% | ~3 years continued operation and A/B testing.
- Sunshine Power | Project Art Owner**

1M+ downloads

 - Delivered complete project art production and Unity implementation across environments, buildings, assets, UI, animation and mobile visual optimization.
 - Results: initial CPI ~\$0.56 | D1 retention ~39% | D1 session length ~30 min.
- Shooting Inc | Project Art Owner**

1M+ downloads

 - Delivered 3D environments and related assets, Unity implementation, mobile optimization and version visual QA.
 - Results: initial CPI ~\$0.55 | D1 retention ~35%.
- Cat Train Tycoon | Project Art Owner**

500K+ downloads

 - Owned cute/cartoon art production and Unity delivery across cat character assets, train/station environments, buildings, props, UI, materials, rigging, animation integration, scene assembly, basic visual effects and mobile optimization.

TOOLS & SKILLS

3D Art	Cinema 4D (primary), modeling, UVs, texturing, materials, environments, buildings, props, character-related assets; 3ds Max for basic rigging/skinning
Unity	Scene assembly, Prefab organization, materials/UI, Animation, Animator, basic particle/trail/VFX adaptation, basic lighting
Optimization	Frame Debugger, GPU Instancing, Dynamic Batching, mesh reduction, material cleanup, texture/icon compression, asset-size and batch control
Visual / Delivery	Photoshop, UI production/restyling, Visual QA, Google Play creatives, Unity -> Cocos Creator playable-ad asset preparation
Additional	Redshift / Octane fundamentals; AIGC-assisted visual exploration and production-efficiency workflows

EDUCATION

Quanzhou Huaguang Vocational College Diploma, Animation Production Technology Quanzhou, China	2019 - 2022
